

OCTAVIOUS KENNEDY

Cybersecurity Engineer | Vulnerability Management Engineer | Security Operations Analyst | Risk Management

PROFESSIONAL SUMMARY

Cybersecurity Engineer with 7+ years of experience supporting vulnerability management, risk assessment, security compliance, security operations, and enterprise infrastructure protection. Experienced in IBM Guardium, Tenable, ServiceNow, Patch Management, vulnerability remediation, patch management, and regulatory compliance including HIPAA and GDPR. Proven ability to identify security risks, implement remediation strategies, manage security controls, and collaborate across cross-functional teams to strengthen organizational cybersecurity posture.

EMPLOYMENT HISTORY

GLOBAL DATABASE SECURITY – STRUCTURED PLATFORM

The Cigna Group

Jul 2025 - Present
Trinity, North Carolina

- Ensure seamless integration of GSE Guardium with enterprise IT infrastructure and databases by collaborating with cross-functional teams, performing security assessments, validating security controls, and troubleshooting integration issues to strengthen security compliance and optimize platform performance.
- Execute software updates, security patches, and patch management activities for Guardium, ensuring systems remain resilient against vulnerabilities, aligned with cybersecurity best practices, and supported organizational vulnerability management objectives.
- Maintain strict security compliance with data protection regulations including GDPR and HIPAA by conducting periodic security audits, reviewing security controls, updating security documentation, and supporting ongoing risk management initiatives.
- Document configuration baselines, security controls, and operational procedures, creating comprehensive technical documentation that supported vulnerability remediation, security auditing, incident investigations, and knowledge transfer across teams.
- Resolved 100+ ServiceNow security and operational tickets by performing security monitoring, troubleshooting platform issues, conducting threat analysis, and providing technical support to improve overall system reliability and reduce security risk.

CYBER RISK MANAGEMENT

The Cigna Group

Jul 2024 - Jul 2025
Trinity, North Carolina

- Conducted risk assessments of third-party vendors, cloud services, and external partners by evaluating security posture, reviewing security controls, and identifying risks associated with access to sensitive organizational data.
- Performed 100+ ongoing security monitoring and threat analysis of emerging cyber threats, vulnerabilities, and security incidents, providing actionable risk management recommendations to senior leadership and key stakeholders.
- Supported continuous improvement of the cybersecurity program by recommending penetration testing, red team exercises, and security control assessments to identify vulnerabilities, validate defensive capabilities, and strengthen vulnerability management processes.
- Established and maintained a centralized risk register to support enterprise risk management, ensuring identified cybersecurity risks, remediation efforts, and mitigation strategies were documented, tracked, and communicated to relevant stakeholders.

VULNERABILITY ENGINEER

The Cigna Group

Jul 2023 - Jul 2024
Trinity, North Carolina

- Partnered with 50+ Subject Matter Experts (SMEs) and Critical Infrastructure Protection (CIP) stakeholders to implement security controls, cybersecurity best practices, and vulnerability management strategies that reduced organizational risk exposure and strengthened security compliance.
- Collaborated with Vulnerability Management, Infrastructure, and Platform SMEs to gather technical and compliance requirements, ensuring vulnerability remediation activities, security controls, and risk management efforts aligned with operational and regulatory objectives.

- Performed 100+ enterprise-wide vulnerability assessments and security auditing activities, validating asset inventories, IP address accuracy, and configuration integrity prior to scanning. Analyzed vulnerability data, prioritized remediation efforts, and delivered detailed reports with actionable recommendations to support risk reduction, vulnerability remediation, and security compliance initiatives.

NETWORK ENGINEER – INTERNSHIP

May 2022 - Jul 2023

The Cigna Group

Philadelphia, Pennsylvania

- Performed continuous security monitoring and threat analysis within the Spectrum queue, investigating network alerts and device-level anomalies to identify root causes, mitigate potential security risks, and maintain network stability across enterprise environments.
- Generated, documented, and managed incident tickets in ServiceNow, supporting risk management processes through accurate classification, escalation, and tracking of security-related events while ensuring compliance with established change management and incident response procedures.
- Leveraged enterprise monitoring and security tools, including SecureCRT, F5, SevOne, QRadar, Spectrum, ServiceNow, and NetScout, to conduct log analysis, traffic monitoring, security auditing, and real-time threat detection across critical network infrastructure.
- Maintained network health, security compliance, and routing stability by continuously validating BGP neighbor relationships and OSPF adjacencies, proactively addressing routing inconsistencies and supporting patch management activities to minimize operational and security risks.

TRANSPORTATION MANAGER | OPERATIONS MANAGER | DIGITAL TRAINING MANAGER Feb 2011 - Jul 2019

United States Army

Various Global Locations

- Managed the morale, health, and training of 123 personnel. Maintained the maintenance and accountability of military equipment valued at \$5.8M+. Planned, managed, monitored the organization transport operations, and ensured optimal performance of daily administrative functions.
- Maintained electronic, administrative accountability, and inventory for sensitive military equipment resulting in zero discrepancies.
- Controlled the inventory of 600+ pieces of military equipment valued at \$25.1M+ resulting in zero discrepancies.
- Completed all strategic, operational, and tactical objectives; resulted in zero inspection failures.
- Directed and trained 1800+ personnel to work autonomously and effectively as a member of a diverse team.
- Provided and reviewed comprehensive training statistics and schedules for over 200 personnel with senior leadership, ensuring mission readiness through effective coordination and dissemination of all training plans.

EDUCATION

M.S., CYBERSECURITY

North Carolina A&T State University

Greensboro, North Carolina

B.S., INFORMATION TECHNOLOGY, MAGNA CUM LAUDE

North Carolina A&T State University

Greensboro, North Carolina

The National Honor Society | The National Society Leadership and Success (Sigma Alpha Pi)

TECHNICAL SKILLS

IBM Guardium, Tenable, ServiceNow, SevOne, Vulnerability Management, Risk Assessment, Risk Management, Security Controls, Vulnerability Remediation, Security Monitoring, Security Auditing, Security Engineering, Patch Management, Security Compliance, HIPPA, BGP, OSPF, Project Management, Operations Management, Cross-Functional Leadership, Training & Development.
